THE REPORT
OF THE
PRESIDENT OF QUEEN'S COLLEGE, BELFAST,
FOR THE
YEAR 1905-1906.

TO THE KING'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

In pursuance of the duty required of me by the Colleges Act (8 & 9 Vict., cap. LXVI., sec. 20), I have the honour to present to Your Majesty my annual Report on the condition and progress of Queen's College, Belfast, during the academic year 1905-6.

As this has been a historic year in our annals, owing to events hereafter to be narrated, it will be convenient, I think, if I—

- I. Report, as usual, upon the ordinary history of the year; and
- II. Speak of the occurrences which mark it out as one of particular significance and importance.

In this way, I conceive, the whole case as to the condition and progress of the College will be most fittingly presented.

- I. In the first place, then, I proceed to consider the ordinary

HISTORY OF THE YEAR.

I commence by speaking of—

THE NUMBER OF STUDENTS

in attendance. Last year I had the satisfaction of reporting a noteworthy advance in this particular, and now it is pleasant to be able to say, not only that this advance has been maintained, but that still further progress has been made. As a matter of fact, one has to go back thirteen years before finding as large a number of students on the books of the College as we had during the session now under review. Full details as to the entrances, the numbers attending, and their distribution among the different Faculties and classes in Arts, Law, Medicine, Engineering, and Music, will be found appended to this Report.

SCHOLARSHIPS AND STUDENTSHIPS.

The examinations for our Scholarships, Studentships, and other honours were held at the commencement of the winter session. For the First Year Scholarships in Arts, pupils from the leading Secondary Schools in Belfast and other parts of Ulster competed, as usual. The successful candidates were supplied by the following schools:—Foyle College, Londonderry; The Methodist College, Belfast; The Royal Academical Institution, Belfast; Campbell College, Belfast; Upper Sullivan School, Holywood; and Rainey School, Magherafelt. The first places, on the Classical and Mathematical sides respectively, were taken by pupils from Foyle College, Londonderry, and the Methodist College, Belfast; while the Upper Sullivan School, Holywood, had the honour of sending in the candidates who took the Modern and the Pakenham Scholarships.

The various Scholarships, Studentships, Exhibitions, and Prizes, of public or private foundation, which we possess, amounting altogether in pecuniary value to over £2,400 per annum, have always been of the utmost service to the cause of Ulster education, both as incentives to study, and as affording to such of our Ulster young men and women, as are not possessed of too large a supply of this world's goods, the means of supporting themselves during their College life. There is no reason why, by means of these endowments, and those of the Royal University, such students may not obtain their education here at a very small rate indeed, or even altogether free. Many have done so. It was a wise provision of the State, when the College was founded, to endow it with moneys for this purpose, and the beneficence of generous friends of education has materially augmented our resources in this respect.

The new Scholarships, founded for the encouragement of modern literary studies, may now be considered to have passed beyond the experimental stage, and the Council has resolved to continue them. The principal subjects of examination for them are English, French, and German. The Scholarships are open, like all our other Scholarships, both to men and women. We have deemed it advisable to found them—a new step in our College—in order to meet the needs of those who wish to pursue a modern course of studies, and we have no doubt that experience will prove its wisdom. I need scarcely say that Classics and Mathematics continue, and will, I hope, always continue, to occupy the place which they hold in our curricula, and the Scholarships which have hitherto been awarded for proficiency in them will still be offered for competition.

HONOURS.

A list of the honours of various kinds gained by our students during the year, at the examinations of the Royal University and elsewhere, will be found in the Appendix to this Report. To give them here would be impossible, the numbers being

very large, and a selection would be invidious. I may mention, however, one interesting and suggestive fact. At the Spring Examinations of the Royal University in the present year, all the honours and exhibitions were carried off by students of this College. This single fact speaks for itself.

LADY STUDENTS.

The number of young ladies who attended Queen's College during last session was again large. The majority of them were students in the Faculty of Arts; but there were several in Medicine and in Music, and one in Law. It is noticeable how many of the names upon the Scholarship and Prize lists are those of ladies.

RELIGIOUS SUPERVISION.

During the session the College had upon its roll the names of members of all the chief religious bodies to be found in Ulster, and, as usual, the excellent provisions made in the College Statutes, for the supervision of the students and their instruction in the tenets of their respective Churches, were faithfully carried out by the several Deans of Residences who have been appointed for that purpose by Warrant under the Royal Sign Manual. At the commencement of the session each Dean was furnished by the Registrar, according to custom, with a list of the names and addresses of the students belonging to his Church, and I now append the reports which I have received from the Deans as to the manner in which their responsible duties were discharged, and as to their opinion of the conduct of the students committed to their care. I give the reports in the order of the seniority of the Deans :—

" St. Andrew's Rectory,

" University-square,

" June 6, 1906.

" DEAR MR. PRESIDENT,—At the close of the current session of Q.C.B., I have much pleasure in responding to your request with regard to the students who are members of the Church of Ireland.

" I rejoice to say that their morals and deportment are unexceptionable. As usual, the session was begun with a conversation in the Union Buildings— and, with the Deans and many of the Professors present, a useful and enjoyable meeting was held—evidently influencing the young men in regard to their course in College.

" I remain, dear Mr. President,

" Your very faithful Servant,

" S. EDW. BUSBY, M.A., CLK., LL.D., T.C.D.

" Dean (C. of I.), Queen's Coll., Belfast.

" The Rev. the President, Q.C.B."

" College Park, Belfast,

" 11th June, 1906.

" DEAR DR. HAMILTON,—I have much pleasure in reporting that the conduct of the Presbyterian students during the session, as far as known to me, has been quite satisfactory.

"At a social meeting held at the beginning of the session, under the auspices of the Students' Christian Union, the Deans had an opportunity of meeting with the students and enjoying an evening of pleasant social intercourse with them.

"I conducted a Bible class in the College, but the attendance was small, owing chiefly, I think, to the impossibility of getting a suitable hour when the students were not engaged in their other classes. I again express my opinion that the College Council ought to arrange the classes, so that on one hour of the week students could conveniently attend the classes of their Deans of Residences.

"I am,

"Yours faithfully,

"MATTHEW LEITCH."

"Methodist College, Belfast,

"4th June, 1906.

"DEAR PRESIDENT HAMILTON,—In reply to the circular received from your Registrar, I beg to say that during the past year the Methodist students at the Queen's College have conducted themselves, to the best of my knowledge, as gentlemen and Christians.

"I am,

"Very truly yours,

"WILLIAM NICHOLAS, D.D.,

"Methodist Dean of Residences."

"Adelaide Park, Belfast,

"April 20th, 1906.

"DEAR DR. HAMILTON,—As I leave Belfast in a few days' time, may I report to you, before I go, on the students who have been under my care during the session. I am happy to say that they have given every possible satisfaction.

"Yours faithfully,

"DOUGLAS WALMSLEY.

"Rev. Dr. Hamilton,

"President, Queen's College, Belfast."

I regret to say that we have lost the services of the last-named gentleman, the Rev. Douglas Walmsley, B.A., who for eleven years has been Dean for the Association of Irish Non-subscribing Presbyterians. During all that time he manifested a laudable interest in the welfare of the students committed to his care, so that it was with sincere regret that I bade him good-bye. On the eve of his departure I received from him the following letter:—

"Adelaide Park, Belfast,

"April 20th, 1906.

"DEAR DR. HAMILTON,—I am closing my ministry—and my term of residence—in Belfast in the course of a few days, and I have to resign the humble position I have held at Queen's College.

"Will you permit me to thank you, as the President of the College, for many kindnesses which you have shown me, and to say how gratefully I have recognised the just and considerate and kindly treatment which students under my care have always received at the hands of the College?"

"I shall carry away with me only the sincerest feelings of honour and regard for Queen's, and the most earnest hope for its continued prosperity.

"Believe me, with kindest regards,

"Yours faithfully,

"DOUGLAS WALMSLEY.

"Rev. Dr. Hamilton."

LOSSES AND GAINS.

During the year the Chair of History and English Literature, which had been rendered vacant by the resignation of Professor Boas, M.A., was filled by the appointment of Professor G. Gregory Smith, M.A. (Oxon.). Like his predecessor, he is a Balliol man, and took his degree in the Honours School of Modern History. He was for several years assistant to Professor Sainsbury, in Edinburgh, where he lectured on the Honours graduation courses in Literary History and the History of the English Language. He examined for the Honours degree in Arts, and represented the University of Edinburgh on the Joint Board of Examiners for the Scottish Universities. Some of his published works, as, for example, "The Transition Period: A Comparative History of European History during the Fifteenth Century," "Elizabethan Critical Essays," two volumes; "Specimens of Middle Scots," and his edition of Pepy's Diary are well known. Professor Gregory Smith has also been appointed by the Crown to succeed Professor Boas in the office of College Librarian, and in both capacities has already proved himself a very valuable accession to our staff.

Through the resignation of Dr. Henry Whitaker of his office as Medical Superintendent of the public health of Belfast, we have just lost his services as Joint Lecturer in Sanitary Science. Dr. Whitaker had held the office since the year 1896, and had given much attention to the instruction of students in a very important subject. On his retirement, the Council passed the following resolution, which was duly conveyed to Dr. Whitaker:—

"The Council of Queen's College desires to place on record its appreciation of the services of Dr. Henry Whitaker during the ten years in which he lectured on Sanitary Science in the Medical School.

"The Council joins in the regret which Dr. Whitaker's resignation has caused amongst his colleagues at the College, and expresses the hope that he may be long spared to enjoy his well-earned retirement, into which he carries the respect and esteem of all his colleagues, and the affection of his students."

We also lost, during the year, the services of Dr. William Mair, Riddel Demonstrator in Pathology and Bacteriology, who resigned on receiving the appointment of Assistant in Pathology in the Victoria University of Manchester. He was

our first Riddel Demonstrator, and discharged his duties in a very efficient and acceptable manner during his tenure of office. In his room, Mr. W. J. Wilson, B.A., M.B., D.PH., was appointed. Dr. Wilson is an *alumnus* of our own, who had a most distinguished career in College and at the University, and had been researching for some time, previous to his appointment, in our Pathological Laboratory.

To our sincere regret we were also deprived, in May last, of the services of Mr. George C. Gough, F.R.S., Demonstrator in Natural History, by his appointment to the Chair of Botany, Geology, and Natural History in the Royal Agricultural College, Cirencester. No one could have been more faithful or efficient in the post which he held here than Mr. Gough. It is expected that his successor will be appointed in time for the work of next session.

Other new appointments made during the session were those of Miss E. A. McCallum, B.A., to be Assistant Lecturer in Modern Languages; Mr. T. B. Vinycomb, M.A., to be Purser Assistant in Mathematics; and Mr. C. A. Ealand to be a Demonstrator in Botany. By next session it is expected that the services of a number of additional assistants and demonstrators will be available, through the aid of the Better Equipment Fund, as is hereafter to be described in this Report.

A death which caused sincere and general regret, not only in the College, but among many former students, occurred during the year. I refer to that of Mr. John Wylie, who from 1872 to 1894 held the office of College Bursar, and discharged the duties with exemplary efficiency and zeal. On his demise the following resolution was entered on the minutes of the Council:—

"The Council have heard with much regret of the death of John Wylie, Esq., formerly Bursar of this College. He had discharged the duties of his office most faithfully and accurately during the twenty-two years which elapsed between his appointment, in 1872, and his retirement through ill-health in 1894. His interest in the affairs of the College continued, however, long after his active work had ceased, and his advice was often valuable when questions involving reference to long past precedent occurred.

"The Council desire to convey to his brother, and successor in office, and to his other relatives, their appreciation of the services of an old and faithful officer, and their sympathy at his loss."

THE LIBRARY.

The following report on the working of the Library during the year has been furnished to me by the Librarian:—

"The Library,

"1st June, 1906.

"DEAR MR. PRESIDENT,—I send herewith a statement of the additions to the Library during the past year (1st June, 1905—1st June, 1906), and I take the opportunity of submitting a short report on the management of the Library since my appointment as Librarian on 22nd November last.

"A considerable portion of the collection, including all books received since 1896, has been re-catalogued on the card system. This work has been carried out by Mr. W. Rapple, assistant-librarian, who has collected the titles of the volumes and added cross-references. It is proposed to incorporate the entries in the printed catalogue, which was published in 1896, in the card-cabinets. I hope the undertaking will be completed before the presentation of the next Library Report. The appointment of a junior assistant, which has been sanctioned by the Council, will allow the work to proceed with greater expedition.

"Two hand-lists of serial publications have been prepared: 'A,' a list of 243 current periodicals, which are added regularly, by purchase or donation; and 'B,' a list of periodicals which have ceased to appear or have been discontinued by the Committee. 'A' has been printed and circulated; 'B' is in final proof.

"A simpler system for the record of books lent and consulted has been introduced.

"A collection of dictionaries, encyclopædias, and other books of reference, has been placed in the Great Hall. Readers have free access to the shelves.

"Reading-room No. I. has been closed, and is now used as a room for the cataloguing of new books, and for the temporary storage of sets which cannot be accommodated in their proper cases.

"The seats for readers in the Great Hall, in Reading-room No. II., and in the Gallery, have been re-arranged. In the Professors' Reading-room an additional rack has been supplied for current periodicals and unbound numbers.

"Other changes are proposed, but they cannot be effected without a large increase in the shelf-space. The Library has now outgrown the building, and serious confusion has arisen in some of the departments. In several there is no room for the addition of a single new volume; in others the small space available has been occupied by 'overflows' from neighbouring sections. Before the Council sanctioned the closing of Reading-room No. I. many volumes lay in stacks in the alcoves of the Gallery. This Reading-room is now full, and long sets of *Hansard's Reports*, *Revue des Deux Mondes*, and other works have been laid on the Gallery floor, against the east and west walls. In another year we shall be, at our present rate of increase, in no better plight than we were before the acquisition of the Reading-room. A special Committee of Investigation has reported that they view this acquisition 'only as a temporary relief, and that the larger question of an addition to the Library accommodation must be seriously considered.'

"I remain

"Yours very sincerely,

"G. GREGORY SMITH.

"To the Rev. the President,

"Queen's College, Belfast."

A complete list of the presentations which the Library received during the year, some of which were very valuable, will be found in the Appendix. Altogether, there were added 1,177 volumes, 148 parts, and 35 pamphlets.

The Library now contains over 54,000 volumes. A large number of literary and scientific journals and reviews, published in the United Kingdom or abroad, which are valuable for purposes of advanced study and research, are taken and afterwards bound for preservation and reference. Not only is the Library open to students, but former students and graduates are allowed to read in it, and to borrow

books, on making a small deposit with the Bursar. With the view of rendering its use still more widely available, the Council, during the past session, made the following new regulation :—

"A Professor in any College in Belfast, a Fellow or Member of the Ulster Medical Society, the Principal or Head of any Department in the Belfast Municipal Technical Institute, a Teacher in any Secondary School in Belfast, or any person engaged in Literary or Scientific Research, on making application to the Librarian, may, if approved by the Library Committee, obtain permission to use the Professors' Room in the Library, in order to consult Books and Literary and Scientific Journals. Any person who has obtained this permission shall be allowed to borrow books from the Library on the same conditions as former Matriculated Students of the College."

I quite agree with the statement in the Librarian's report that the question of an addition to the Library accommodation must be seriously considered. Undoubtedly this is a matter which will not brook much delay. The Library is growing rapidly year by year, and accommodation must be found for its accumulated treasures and for the large numbers of readers who use them.

THE MUSEUMS AND LABORATORIES.

The various museums have been carefully maintained, under the care of their several curators, during the year.

Regarding the Natural History Museum, Professor Gregg Wilson, D.Sc., reports as follows :—

"In the past year the accommodation of the Natural History Museum has been considerably extended by the erection of a gallery in the North-room. This has been fitted with cases, and these are devoted to the displaying of botanical specimens. In the South-room the space formerly occupied by the small plant collection has been made use of for extending the Zoology type collection, and two new cases have also been added for the same purpose. One of the latter is filled with new sets of embryological models, executed by Ziegler of Freiburg. The chief change in the Geology collection has been the providing of cabinets of drawers with duplicate specimens of the more important minerals, rocks, and fossils for the use of students. In this way the exhibition collection is preserved, and at the same time students can handle freely a good set of typical specimens. It is intended to provide a similar duplicate set of zoological specimens for the use of students."

The Medical Museum continues to receive additions to its treasures through the thoughtfulness of members of the profession. The Materia Medica Museum is reported to contain a good collection of specimens, which have been arranged and named in accordance with the new British Pharmacopœia, and this Museum will shortly, we hope, be enlarged. The Museum of Sanitary Science continues to receive the anxious and kindly attention of its founder, Dr. Henry O'Neill, B.L., who reports that it has been "maintained in good order during the year." A goodly list of donations to all the Museums, with the names of the donors, will be found in the appendix.

The Chemical, Physical, Anatomical, Physiological, Pathological, and Pharmaceutical Laboratories were all busily employed during the year.

THE COLLEGE SOCIETIES.

The various College Societies appear to have had useful and successful sessions.

The Union Society had for its president Mr. W. H. Davey, M.A., and the advantage of having such a comfortable and well-appointed building for the use of the students, affording, as it does, excellent accommodation to their various societies and clubs, and containing comfortable reading rooms, library, dining and refreshment rooms, recreation rooms, &c., becomes more evident every year. It is hoped that the building will be entirely re-painted and renovated, internally and externally, before the beginning of next session, so as to make it more attractive and comfortable than ever. The membership of the Union continues to grow with the growth of the College.

The Literary and Scientific Society completed, last session, the fifty-seventh year of its history. The president was Mr. Thomas M. Johnstone, B.A. The Dufferin Medal, presented by the Dowager Marchioness of Dufferin and Ava in memory of her noble husband, and which is awarded each session to the member who, in the judgment of the Society, has proved himself the best speaker at the meetings during the year, was awarded to Mr. James Anderson, B.A.

The president of the Medical Students' Association was Mr. W. J. Wilson, B.A., M.B., Riddel Demonstrator in Pathology and Bacteriology, and the meetings were full of interest and instruction.

The Students' Representative Council was presided over by Mr. W. H. Davey, M.A., and discharged much important business.

The president of "The Association of Old Belfastmen in London" this year was Dr. J. J. Redfern, and it is pleasant to see from the report of the proceedings at the annual dinner, held in May, that the loyalty and love for their *alma mater*, which have so long characterised the London Queen's men, continue unabated. As indicating in some degree the extent to which this College is represented in England, it may be mentioned that in the metropolitan area alone there are 98 practitioners of medicine who were educated here, and in the provinces no fewer than 397.

VARIOUS APPOINTMENTS.

The following professors and lecturers in this College were this year appointed Examiners in the Royal University:—The Rev. R. J. Semple, M.A., in History; Professor Baxter, LL.B., in Law; Professor Lindsay, M.A., M.D., in Medicine; Professor Symmers, M.B., in Pathology; Professor Byers, M.A., M.D., in Midwifery; Professor Sir William Whitla, M.A., M.D., in *Materia Medica*; Professor Milroy, M.D., in Physiology; Professor Sinclair, M.D., in Surgery; Professor Gregory Smith, M.A., in English; Professor Fitzgerald, M.I.C.E., in Engineering; Mr. Lawrence Walker, M.U.S.D., in Music.

The following, who are already Fellows, continue in office :—Professor Dougan, M.A., in Latin; Professor Park, D.LIT., in Mental Science; Professor Dixon, D.SC., F.R.S., in Mathematics; Professor Morton, M.A., in Natural Philosophy; Professor Letts, D.SC., in Chemistry; Professor Gregg Wilson, D.SC., in Natural History.

Professor Symington, M.D., F.R.S., has been re-appointed a Medical Fellow in Anatomy.

Professor Gregg Wilson, D.SC., has been appointed Thomson Lecturer on Natural History in the United Free Church College, Aberdeen, for the session 1906-7. The duty consists in delivering ten lectures during the session.

Mr. James L. M'Kee, B.A., has been nominated to a Research Scholarship placed at the disposal of the College by the Royal Commissioners of the Exhibition of 1851. The Scholarship is of the value of £150 per annum, and is tenable for two, or, in special circumstances, for three years.

Professor Dill, in the long list of whose academical distinctions the College feels itself honoured, has had yet another honorary degree conferred upon him—that of LL.D. by the University of St. Andrews.

And Mr. J. McLeavy Brown, an old student who has risen to be Chief Commissioner of Customs in Corea, has been knighted, to the great pleasure of all in the College.

MUSIC.

The newly-instituted department of Music was ably conducted during the session under the directorship of Dr. Lawrence Walker. The number of students of Harmony, Counterpoint, and Musical Form and Composition, was double that of the previous session; and a series of chamber concerts and recitals on the Mitchell organ, conducted by Dr. Walker, was given during the winter.

Dr. Walker has now been appointed an Examiner in Music to the Royal University, so that, for the first time, Belfast is represented on this board.

LAW.

A very important change was made during the year by the Council of the Incorporated Law Society in the regulations governing the attendance of solicitors' apprentices at the lectures of our Law professors, and the Law professors in the other Queen's Colleges. Under the "Solicitors (Ireland) Act" of 1898, solicitors' apprentices may shorten their period of service from five years to four by attending these lectures for two sessions and passing the class examinations. As the lectures in each class are only twenty-four in number, this is a very substantial advantage. But the apprentices have been

hitherto deprived of much of its benefit by a resolution of the Incorporated Law Society, which provided that the first of these two years of attendance on lectures must be completed *prior to entering into indentures of apprenticeship*, the total period of legal instruction being, by this arrangement, made to be still five years and not four. This regulation has now been altered, and a person may in future attend both of the two classes of College lectures either before or after entering into indentures, and this amended regulation is made applicable both to present and future apprentices. The change will evidently much facilitate the attendance of solicitors' apprentices at the Law classes, and tend to promote the prosperity of this important department of the College.

I have thus sketched, succinctly and, I hope, lucidly, the course of the events of our ordinary College history and life during the past academic year, and I now proceed, according to the arrangement marked out at the beginning of this Report, to speak—

II. Of the occurrences which mark out the session of 1905-6 as one of particular interest and importance.

To do this rightly, I must revert for a moment to the history of that great Equipment Fund, born in 1901, which, however bright were the hopes which clustered around its cradle, no one probably imagined would come so completely to dominate and benefit our College polity, as, notwithstanding its recent origin, it undoubtedly has. A few sentences will suffice to narrate the salient facts of its history.

The Fund was established at a meeting held on 16th April, 1901. It is of historic interest to note the names of the speakers on this occasion. They were, in addition to myself, the Lord Mayor of Belfast (the Right Hon. Sir Daniel Dixon, Bart., D.L.); the late Marquess of Dufferin and Ava; the Marquess of Londonderry, K.G.; Professor Letts, D.Sc., Ph.D.; the late Sir James Musgrave, Bart., D.L.; the Right Hon. W. J. Pirrie, LL.D., D.L.; Professor Symington, M.D., F.R.S.; Mr. G. W. Wolff, M.P.; Professor Dill, Litt.D., LL.D.; Sir William Whitla, LL.D., M.D.; Sir Otto Jaffe, J.P.; Mr. Robert Thompson, J.P.; Mr. Edward Cocy, J.P.; the late Professor John Purser, LL.D.; Mr. John McCannell, J.P.; and the late Mr. D. G. Barkley, LL.D.

The Fund went on until, at a meeting of the subscribers held in June, 1905, it was reported that, as the result of four years' work, £29,633 had been subscribed, that interest, amounting to £407 17s. 8d., had been received, making altogether £30,040 17s. 8d., and that the following valuable additions had been made to the equipments of the College:—

"The Musgrave Chair of Pathology," by means of a subscription of £5,000 from the late Sir James Musgrave, Bart.;

"The Purser Studentship in Mathematical Science," for the establishment of which Professor Frederick Purser, F.T.C.D., gave £3,000;

"The Riddel Demonstratorship in Pathology and Bacteriology," for which the Misses Riddel gave £5,000;

"The Mitchell Organ," erected by the widow and family of the late Mr. W. C. Mitchell, J.P.;

A new Biological Laboratory;

A Lectureship in Music;

A Library of Music; and

A Playing Field rented for the use of the students.

By means of grants from the Fund, several other departments were helped to a valuable extent.

On the 22nd September, 1905, I reported to the Committee that I had received a letter from Sir Donald Currie, G.C.M.G., offering to contribute £20,000 to the Fund, on condition that an additional sum of the same amount was subscribed before Christmas.

On the 23rd September, 1905, I published in the Belfast newspapers a letter communicating the terms of Sir Donald Currie's offer, and appealing to old students and to the public generally for subscriptions. A copy of this appeal will be found in the Appendix.

An official appeal was subsequently issued, signed by the Lord Mayor of Belfast (the Right Hon. Sir Daniel Dixon, Bart., M.P., D.L.); the Earl of Shaftesbury, H.M.L.; the Marquess of Londonderry, K.O.; the Right Hon. Thomas Sinclair, D.LITT., D.L.; the President of the Belfast Chamber of Commerce (Mr. Alexander Cooke); Sir Otto Jaffe, J.P., Chairman of the Executive Committee of the Fund; and myself. This appeal is also appended.

On the 5th December, 1905, subscriptions to the amount of £17,000 had been obtained. Three thousand pounds remained, however, to be subscribed, before we could claim Sir Donald Currie's offer, and the minds of many were agitated by contending hopes and fears as to the likelihood of success. On the afternoon of that 5th of December, however, I had the extreme pleasure of receiving from Sir Otto Jaffe, an unfailing friend of the Fund from the outset, who had contributed munificently to it, not once but twice, a brief letter which set all our doubts at rest, intimating that he wished to subscribe a further sum of £3,000 (making £4,000 in all), so as to complete the required £20,000.

I was now able to report to Sir Donald Currie that the conditions of his offer were fulfilled, and on the 12th December, 1905, I received his cheque for £20,000. Further subscriptions to the amount of £713 2s. 3d. subsequently came in, and interest amounting to £603 15s. 3d. has been received up to the 15th January last.

A full list of the subscriptions given by the public-spirited and kindly benefactors, who have behaved so nobly in this great enterprise, and have placed Queen's College and the education of Belfast and the entire North of Ireland under lasting obligations by their generosity, will be found set forth in the Appendix to this Report. It is intended to print

this list for permanent record in the "Calendar" of the College, which is published annually.

Having obtained the stipulated sum, the efforts of the Committee were now directed to the preparation of a scheme for the judicious investment and expenditure of the moneys placed at their disposal. Some of the contributions were earmarked for specific purposes by their donors, whose wishes will, of course, be scrupulously respected.

It was at once resolved that the moneys should be invested in the names of trustees, under the direction of the Allocation Committee, subject to any conditions that may have been imposed by donors. This Committee is constituted in pursuance of the following resolution passed at the inaugural meeting of the Fund:—

"That the allocation of the moneys which shall be raised, other than those which may be earmarked for particular objects, shall be entrusted to a committee consisting of the President, six gentlemen nominated by the Executive Committee, and six members of the College staff nominated by the Council."

The following is the present constitution of this important Committee:—

Chairman:

The President of Queen's College.

Secretary:

R. T. Martin, B.A.

Members:

| | |
|--|---|
| J. Taylor Blackwood, J.P. | Professor Letts, PH.D., D.Sc. |
| Professor Dill, LL.D., LL.D. | John McConnell, J.P. |
| Professor Fitzgerald, B.A., Assoc. M.L.C.E. | Professor Gregory Smith, M.A. |
| T. C. Houston, LL.B. | Professor Symington, M.D., F.R.S. |
| Sir Otto Jaffe, J.P. | Professor Sir William White, M.A., M.D., LL.D. |
| R. Kyle Knox, LL.D., J.P. | |

The following gentlemen were asked, and consented, to become trustees of the Fund:—

| | |
|--|---|
| J. Taylor Blackwood, J.P. | Henry Musgrave. |
| Sir William Crawford, J.P. | The Right Hon. Thomas Sinclair, M.A., LL.D., LL.D. |
| The Rev. Thomas Hamilton, D.D., LL.D. | Sir Hiram Shaw Wilkinson, LL.D. |
| Sir Otto Jaffe, J.P. | |

A trust deed, drafted by Mr. R. T. Martin, B.A., Solicitor, who has been unflinching in his services to the Fund ever since its inception, has been submitted for approval to another kind and most valuable old student of the College, His Honour Judge Shaw, K.C. The Executive Committee have approved of its provisions and instructed it to be finally executed, so that the moneys of the Fund may be effectually safeguarded. This deed is so arranged that any person who may from time to time, in future, desire to contribute money for any College purpose, may have his wishes securely carried out under its provisions. Messrs Stewart Blacker Quin & Co., Belfast, chartered accountants, have kindly consented to act as honorary auditors. They have already gone carefully through all the accounts, and have found them most accurately kept, as was to be expected, seeing that they were from the beginning

under the personal care of Mr. J. Taylor Blackwood, J.P., Director, Ulster Bank, Belfast, of whose untiring and most valuable labours on behalf of the Fund both I and the Committee have had continual experience.

At the request of the Allocation Committee, the College Council drew up a report on the best method of utilising the Fund, and this was laid before the Committee at a meeting held on 11th June last. It stated that the Registrar had issued a circular to all the professors and lecturers, inviting them to send in, for the consideration of the Council, their views as to the needs of their respective departments. These statements, having been received, were very carefully considered by the Council at several meetings, and finally they recommended, first, the allocation of £5,400 for additions to the College buildings, in order to obtain a grant of £5,400 proposed to be given by the Treasury for the same purpose, making £10,800 in all; a grant of £300 per annum to the College Library, an annual grant for the Athletic Field, and annual grants to the following departments for the provision of additional Readers, Assistants, Demonstrators, &c. :—

History, Modern Languages, Ancient Classics, Natural History, Physics, Engineering, Chemistry, Pathology and Bacteriology, Anatomy, Physiology, Medicine, Surgery, Midwifery.

In their report, the Council gratefully acknowledged that "the sum placed at the disposal of the Allocation Committee by the generosity of the public will greatly improve and strengthen the equipment of the College," but they felt compelled to add that "a large sum of money is still required if the College is to be enabled fully to meet the numerous and pressing claims of higher education in Ulster." This report and the recommendations were approved and adopted by the Allocation Committee.

Pari passu with the maturing of this scheme, the preparation of plans for large additions to our buildings was being busily pushed forward. The additions contemplated are as follows :—

1. The completion of the building devoted to Chemistry, by the addition of a new and properly fitted Lecture Theatre, a Preparation Room, a Chemical Museum, and other accessories. As the building already contains fine Laboratories for qualitative and quantitative analysis, a large Practical Class-room, rooms for water and gas analysis, Balance Room, Research Rooms, Dark Room, &c., it will, when these additions have been made, be fairly complete.

2. A Museum of Sanitary Science, properly fitted for the purpose, which will suitably accommodate the collections so kindly provided by Dr. Henry O'Neill, B.L., and any others which may be obtained.

3. An enlargement of the Physiological Laboratories by the addition of a Practical Physiological Class-room; a Practical Physiological Chemistry Class-room; a Practical His-

tology Class-room, and a Lecture Theatre. These, with the accommodation already provided, which includes private Research Rooms, Centrifuge Room, Dark Room, Apparatus Room, &c., will furnish this department with much-improved and excellent accommodation.

4. An enlargement of the Pathological Laboratories by the addition of a large Laboratory for the Musgrave Professor of Pathology, rooms for practical work in Bacteriology and Medical Jurisprudence, and a Demonstrator's Room. These additions will, taken together with the accommodation already provided, afford much greater scope for the work of this very important department.

5. A new Pharmaceutical Laboratory, specially fitted up for practical instruction. The old Engineering room, which is about to be vacated, is to be utilised for this purpose, and, as now planned, it will make an admirable Laboratory.

6. A new Lecture Theatre, specially fitted for the requirements of the department of Operative Surgery, with a room for assistant adjoining.

7. Alterations and improvements to the existing Lecture Rooms and Professors' Rooms, in the various Arts and other Departments, so as to render them more comfortable for professors and students and better adapted to their work.

8. The new Laboratories for Physics and Engineering, which have been in process of erection for some time, form another great addition, and are now nearly completed. They contain Practical Class-rooms, Workshops, Laboratories, Lecture Theatres, Drawing Office, Professors' Rooms, &c., and undoubtedly constitute one of the most notable and serviceable additions ever made to the College buildings.

9. The new Biological Laboratory, mentioned in the Report of last year, is also completed. It includes a Laboratory about 80 feet long for junior classes in Biology, others for advanced classes in that subject, in Geology, and in Botany, and private Research rooms for the professor, his assistants, and others.

10. An enlarged and newly fitted Materia Medica Museum.

Tenders for all of these works which have not yet been executed have been invited.

Before leaving the subject of our buildings, it is only right that I should express our acknowledgments to the Commissioners of Public Works in Ireland and their officials, for the ability and care which they have devoted to the task of planning and executing them. Our demands upon them this year have been unusually heavy, but the manner in which they were met left nothing to be desired.

When the various works which I have enumerated are completed, the College will be in possession of suites of buildings for its various departments and requirements such as its founders probably never dreamt of its enjoying, and which must conduce enormously to the better doing of the great work carried on from day to day within our walls.

Nor must it be forgotten that to all the increased equipment which I have thus described, there are also to be added the important endowments created prior to this year by our Better Equipment Fund, and which I have enumerated in a previous part of this report.

The whole long list of benefactions, some of them splendid in themselves, and all, when taken together, constituting a truly noble whole, is a record of which any College might be proud, and which reflects infinite honour upon those to whose spirited action it is due. When it is further borne in mind that the entire enterprise, of which I have briefly told the story, has been carried out within the space of five short years, and the larger part of it within about as many months, our gratitude may well be increased tenfold, and we may be heartened to face any tasks or vicissitudes which the future may have in store for us.

It only remains to be added that we have resolved that, in memory of the great events of this eventful year, and in recognition of the munificence which gave them birth, the following buildings, to the erection of which I have already referred, shall in all time coming bear the names which I append, these in each case to be cut in stone upon the front:—

I.—The range of Chemical Laboratories to be named "The Donald Currie Laboratories," in memory of his great benefaction.

II.—The Physiological Laboratories to be named "The Jaffe Laboratories," in remembrance of the munificence of Sir Otto Jaffe, J.P., and his brother, Mr. John Jaffe, J.P.

III.—The Laboratories in Physics and Engineering to be named "The Harland Laboratories," in memory of the late Sir Edward Harland, Bart., one of the most eminent of Belfast men, and one of the staunchest friends of the College; and

IV.—The Pathological Laboratories to be named "The Musgrave Laboratories," in remembrance of the late beloved Sir James Musgrave, Bart., and of the members of his family, who have done so much for this department.

Such, in brief, is the story of the Better Equipment Fund, and what it has done for the College. Its advent upon the scene of our affairs effected a marvellous change, greater even than is apparent upon the surface. And we cherish the hope that its work is not yet done.

While these sheets were passing through the Press, we had the pleasure of receiving within the College our munificent friend, Sir Donald Currie. He was accompanied by Lady Currie, and the Council took the opportunity of presenting him with an Address, expressive of their gratitude for all that he has done for us. The Students' Representative Council also presented him with an Address. Both these documents will be found in the Appendix to this Report. It is unnecessary to say that the presence of our generous benefactor was hailed with the greatest enthusiasm, which was increased by an announcement which he made that, in addition to what he has done, he would contribute the fourth part of the cost of a new Athletic Field for the students, provided the other three-

fourths were obtained within a year. One scarce-knows how to characterise such splendid generosity as Sir Donald has displayed to the College. Of one thing he may rest assured—his name can never be forgotten among us.

It is evident from what I have said of this great Fund that its work has been, and will be, of enormous advantage to the College, and through it to what is much more important than the College, the education of the North of Ireland. The names and the labours of the men who devised the Fund, who have wrought for it patiently, and earnestly, and wisely, all these years, alike when the sun shone brightly and clearly upon their work, and when gloomy and threatening clouds overcast the sky, must always be honourably and admiringly enshrined in the memories of Queen's men and in the annals of the College. For myself, I can never cease to thank them for the help which they have rendered to me in a very difficult and lengthened task, and I know that my view of their labours is that of the College generally. It is not, I think, too much to assert that these men have made the first *lustrum* of the twentieth century the most conspicuously memorable, in many respects, in all the long history of Queen's. This I say, not only because of the first appearance during this period, within our academic shades, of the golden gleam of the waters of the hitherto unseen Pactolus, a branch of which had been diverted into the College grounds by the labours of those to whom I allude. It is also because these eventful years have witnessed the birth among us of a new spirit, of what I may almost call a new type of academic life, and a new and delightful combination of academic and civic forces for the advancement of education and culture in our city and province. All this remarkable evolution, as one may call it in the scientific phraseology of our time, had its origin in the opening months of the first year of this century. It reached its climax (I do not say its end, for we all hope the end is not yet) in the last month of the fifth year, thus exactly completing the classic *lustrum*, and I know no other five years in the life of Queen's which can at all compare with these in interest, importance, or fruitfulness. All honour to the men who have made this history!

I am thankful to be able to add to this chronicle of local effort the fact that the Treasury has recognised, in a practical and gratifying manner, the generosity of our benefactors, by making, at my request, and in response to those efforts, a grant in aid of that extension of our building which has become imperatively necessary owing to the present and prospective growth of the College and the expansion of its work. I feel, it is true, a two-fold regret here. The grant is not large. It is but £5,400. Compared with the £70,000 which we have just raised, this sum cannot at all events be described as exorbitant. And it possesses this other regrettable feature—that it was conditional on our contributing for these buildings a corresponding sum out of our own not too extensive resources. We had intended devoting practically the whole of the proceeds of the Equipment Fund to the provision of

additional teachers of various kinds in the College, and to the better support of our Library, and we accordingly endeavoured to get this condition, which was imposed by the Treasury, removed, and to have the entire £10,800 contributed by the Treasury itself as a set off to the £70,000 which private beneficence has provided for us. I am still of opinion that this claim was just. But it did not succeed, and the Allocation Committee of our Fund very wisely, I think, under the circumstances, though reluctantly, agreed to contribute the £5,400 required. The buildings have now been planned and tenders for their erection received, and the work will shortly begin. The *aliquid amari* is inevitable in mundane affairs, and therefore, although we regret that in this instance the contribution of the State is proportionally so small, and our own, perhaps, excessive, it is the part of the philosophic mind, instead of wasting time in vain repinings, to submit to the decrees of the Fates with such grace and equanimity as may be summoned up, and rather to rejoice in the good which is brought us than to fret over the evil which is mingled with it. The sum now to be expended on these additional buildings, will undoubtedly provide an amount of accommodation for our work, and increase our means of teaching, to an extent far beyond what the money would at first sight appear to render possible. It may be noted as an interesting fact, *en passant*, that, when this sum has been expended, we shall be in possession of buildings, the entire cost of which, so far as I can ascertain it, may be set down at about £100,000. This does not include the scientific and other equipments, or the value of our other endowments, which, if added, would of course swell the amount to a very much larger figure.

And we have a further consideration wherewith to console ourselves at present, and it is one of no little consequence. The Treasury has given us in this grant a practical recognition of our claim for adequate State aid in the future in the performance of the great work which the State has given us to do, and if our gratitude for the concession is perforce to some extent of the proverbial Irish type, yet it is undoubtedly genuine gratitude notwithstanding.

I have now finished my Report, and I cannot express a better hope for the College than that its President may never have a worse account of it to give.

I have placed the usual statistical and other tables in the Appendix, together with a list of the Executive Committee and other office-bearers of the "Fund for the Better Equipment" of the College, a full list of the subscriptions thereto, and several letters and documents relating to its business, and beg to subscribe myself

Your Majesty's

Most dutiful Servant,

THOMAS HAMILTON.

OFFICIAL APPEAL IN CONNECTION WITH THE OFFER OF
SIR DONALD CURRIE, G.C.M.G.

DEAR SIR,

At a meeting of the Executive Committee of this Fund, held on Friday, 22nd September, the President of Queen's College announced that Sir Donald Currie had offered to give £20,000, provided that an equal sum was contributed by others before Christmas.

The College has already benefited largely through the contributions which have been given to its "Better Equipment" Fund, by the foundation, for example, of the Musgrave Chair of Pathology, the Riddell Demonstratorship in Pathology and Bacteriology, the Purser Studentship in Mathematics, the appointment of Lecturers and Assistants in various departments, the erection of a great Organ in its Hall, and the provision of a Playing Field for the students. A new Laboratory has been built and equipped, and the building of another is in progress.

Much, however, remains to be done if the College is to keep abreast of the progress of science and to maintain its reputation as an institution of the first rank for higher education and research. The grant, for instance, for the maintenance of the Library is quite inadequate: with the exception of Mathematics and Pathology, there are no endowments for Assistantships and Demonstratorships in connection with any of the Chairs, and the sums which can at present be allocated to the various Laboratories are utterly insufficient for their proper equipment and upkeep. The munificent offer of Sir Donald Currie is a generous recognition of what has already been done by voluntary effort and a noble incentive to still more vigorous action. He has placed within the reach of the College the largest contribution ever given to it, one that would enormously increase its usefulness and influence as a great educational centre.

Already, thanks to the generous kindness of friends of Queen's College, over £12,000 have been raised within a very short time, and the task of meeting the required conditions has thus been materially lightened. We cannot doubt that the noble spirit, which has carried the project so far on its way, will continue until the whole sum shall have been secured. But it should be remembered that the latter part of a movement like this is always the most difficult. It will need the active support of every friend of Ulster education to carry the scheme to its desired consummation within the short time which now remains.

We earnestly appeal to the people of Belfast and the North of Ireland to afford their utmost aid to the project. Our Queen's College has for many years afforded, with success and distinction "to all classes and denominations, without any distinction of religious creed whatsoever, an opportunity for pursuing a regular and liberal course of education," as its Charter provides. It is sincerely to be hoped that it will now be enabled to take full advantage of Sir Donald Currie's noble offer, and thus largely increase its resources for performing the great work committed to it. With the prosperity of Queen's College the welfare and advancement of our city and province are closely bound up.

Earnestly commending this important matter to your kind and immediate consideration,

We are,

Yours faithfully,

DANIEL DIXON,

Lord Mayor of Belfast.

SHAFTESBURY, H.M.L.,

Visitor of Queen's College.

LONDONDERRY,

Chairman of Visitors.

THOMAS HAMILTON,

President of Queen's College.

APPEAL FROM THE PRESIDENT, IN CONNECTION WITH THE OFFER OF SIR DONALD CURRIE.

(Addressed to the Editor of each of the Belfast newspapers.)

SIR—This afternoon I had the great pleasure of laying before the Executive Committee of the Fund for the Better Equipment of Queen's College, Belfast, a letter which, I feel sure, the people of our city will be glad to read in its entirety. It was handed to me a few weeks ago by Sir Donald Currie, G.C.M.G., on the last day of a memorable and most delightful visit which, in company with my friend Sir William Whitla, I paid, at his kind invitation, to his lovely Highland home. The letter is as follows:—

“Garth, Aberfeldy, Perthshire,

10th August, 1905.

MY DEAR SIR—

I think it may be well for me to put in writing, for you to take with you to Belfast, a brief statement of what is passing in my mind in connection with your appeal to me to assist you, and the Committee of the Better Equipment Fund, in your earnest effort to promote the efficiency, prosperity, and success of Queen's College, Belfast.

When you asked me about a year ago to assist the College, and reminded me of my school days in Belfast, I told you how glad I would be to consider whether, and in what way, I could help the College. I had in hand at the time the scheme for London University and Hospital, and I had afterwards to give assistance in connection with Edinburgh University.

I confess that it appeared to me that I had done quite enough for hospital and university work; but when you wrote to me the other day that the £15,000 which you had collected up to a year ago had now been increased to £30,000, I replied that this encouraged me to see what I could do to help your efforts in the interest of Queen's College.

The natural course for me, as interested in the prosperity of Belfast and education in Ireland, is to offer you a contribution in some proportion to that in which others appear to have subscribed, as shown in the list you have handed to me; but I have thought something more might be accomplished, and that I could give hearty consideration to the question how best to promote, in the most effective way, the permanent interests of Queen's College. To this end I have come to the conclusion it would be of advantage to the College if an immediate serious joint effort on the part of all concerned could be put forward to make an end of the difficulties you have to contend with in the work of the College.

It is quite plain you require additional professors, or, any way, a considerable increase of lectureships; you should have a good library; there seems to be a necessity for the completion of a chemical laboratory; you tell me that equipment and apparatus are required, and that, if you had the means there should be an enlarged museum and students' chambers.

Now, I ask myself how all this is to be secured. There is evidently a necessity to find sufficient money, and this amount cannot be much under £40,000, in addition to the £30,000 which you have already received—you indicate that £50,000 would be better. I do not think, for my part, I should offer a gift for a special object in the total of your pressing requirements. It is in the interest of the scheme as a whole that I am more concerned, and, consequently, I have come to the conclusion to offer to you and to the Executive Financial Committee of the Queen's College the following:—

1. I am ready to give a contribution somewhat proportionate to that which others of your friends have given, if you think the whole scheme cannot be successfully carried out.
2. Or I am willing to offer to you £10,000 provided others will contribute to an equal extent.
3. In the hope that the whole scheme, as sketched out by me, can be successfully carried out, and that you can obtain from others an equal amount, I will give £20,000.

It is to be a condition of the foregoing that the proposals in 2 and 3 are entirely conditional upon equivalent amounts being collected, and this before Christmas next. For I have many things to consider, and not very much time for it at all; therefore, I point out the necessity of limiting the time within which I am to complete the proposals which I have set forth. In order to assist you still further, I shall write to some friends connected with Belfast, and to others who have no connection with that city.

I am well aware of the difficulty, from a political point of view, which His Majesty's Government may feel in giving the College the assistance, which, from your annual report, I see you had expected; but, all the same, I propose to see what success can follow a representation of the case, which I intend to submit to those in authority.

Assuming, however, that these efforts may be without any result at all, I repeat my readiness to carry out the proposals which I have thought it of advantage to put before you, for consideration by yourselves and those who are interested in Queen's College.

I remain,

Yours very truly,

DONALD CURRIE.

The Rev. Thomas Hamilton, D.D.,
President of the Queen's College, Belfast."

I feel sure that your Belfast readers will peruse with no common interest this admirably conceived and beautifully expressed letter from one who looks back, through the long vista of years, to the city where he spent his boyhood, and, in token that he has not forgotten it, offers to it this princely gift.

Perhaps I may be allowed to explain in a few words the occasion and the precise object of the proposed benefaction. For some time Queen's College has been engaged in a strenuous effort to better its equipments, so as to bring them into line with the scientific and educational advances of our time, and with its own growth and development in recent years. This enterprise was inaugurated four years ago, and, notwithstanding adverse circumstances, which need not be detailed here, quickly attained a very gratifying success. A sum of over £30,000 has been raised, by means of which most important additions have been made to the working power of the College. A new Chair, several Lectureships, and a Studentship have been founded. One admirable Laboratory has been built and equipped, and the foundations of a second will, I hope, be laid before many weeks have passed. A great Organ has been erected in our hall, and a scheme for education in music has been brought into operation. Finally, that physical training may not be neglected, an excellent playing field has been provided for the use of the students.

The necessity for these additions to our equipment is accentuated by the fact that the attendance at the College last session was the largest that we have had for years, some of the departments being, indeed, quite overcrowded.

Sir Donald Currie's splendid proposal now arrives to crown and complete this work in which we have been engaged. If we can, with the kind help of our friends, succeed in satisfying the very reasonable conditions which he lays down, the fund will be increased at one bound to £70,000, and the College will be placed in a financial position such as it has never occupied, for the Treasury can now scarcely refuse still further to increase our endowments. If we fail—but I trust we need not contemplate that dire possibility. The loss of the £40,000 now placed within our reach would be nothing short of a calamity, not only to Queen's but to Belfast and Ulster. And it must be remembered that we cannot hope ever again to have such an offer as this.

The question will naturally be asked by some: On what precise objects will this money be expended? The answer is supplied in the last report of the Committee. Several more Chairs, it is there stated, remain to be dealt with. Not a few additional lecturers are urgently needed. Apparatus and equipments of various kinds are loudly called for, and, last but not least, the Library is in serious need of larger funds to enable it to meet the increasing demands made upon it by all departments of the College. To do all this means a large amount of money. To give an additional £200 per annum to the library, *e.g.*, £5,000 would be required; and so in proportion with other objects. Every penny of the additional money is, therefore, required. Very much more could be well and usefully employed.

May I, therefore, most earnestly appeal through your friendly columns for help in raising the sum of £20,000, to which we must see our way before Christmas? The College must ask the kind aid of every friend it possesses, in this supreme hour of its necessity. This is the largest enterprise in which it has ever engaged, and promises to be the most fruitful. The friend in need will now be eminently the friend indeed, and the help of this friend in deed will not readily be forgotten, either in the College or the city. I hope the people of Belfast, among whom Queen's has stood and worked for nearly sixty years, and to whom, I must gratefully testify, I have never appealed in vain—I hope the people of Ulster, whose sons have for generations been coming here for their education—I hope our old students, who owe much to their *alma mater*, and have so often proved the depth and sincerity of their love for her, will all rally to her aid in this crisis of her history. I should like to see—I am sure Sir Donald would like to see—a very large representation of all these classes upon the subscription list now to be opened. I hope no one will hesitate to contribute because he cannot afford to give a large sum. We need large sums, but we shall also be glad of small. Personally, I shall welcome the guinea of the man who cannot spare more as truly as the larger gift of the more wealthy, and I shall feel that the welding together in loyal allegiance to Queen's College of those who have trodden her courts and sat in her classrooms with the citizens who throng our busy streets, and the people of Ulster generally, will in itself be a happy outcome of the present movement, altogether apart from its pecuniary result.

One closing remark I make. The time within which this task must be completed is very short. Exactly three months remain for its accomplishment. Now, it would obviously be impossible, in this brief period, to make personal application to all whom we should like to ask to help us. It will, therefore, assist us exceedingly if those who are interested in our welfare will, on reading this letter, take it as a personal appeal, and kindly communicate with me. A subscription promised in this way will be doubly valuable, and will save an amount of labour and correspondence from which we shall be glad to be relieved, and for which there will be little time.

Already I am glad to say I have received such promises of help from a few friends to whom I have spoken as convince me that success is within reach if the beginning which has been made is vigorously and generously followed up. It has been resolved, however, not to publish promised subscriptions in the newspapers until the week after next (the first week of October) in order that all who would like their contributions acknowledged in the first list may have time to think the matter over. I hope to see in it the names of a goodly number belonging to all three classes which I have mentioned, proving by their proffered aid their real interest in the education of our city and province, and in the welfare of a College to which both already owe so much. It will be a great pleasure to me to hear from all such.

Believe me,

Faithfully yours,

THOMAS HAMILTON, President.

Queen's College, Belfast,

22nd September, 1905.

P.S.—To prevent misapprehension and facilitate the efforts of our friends, I should perhaps say that Sir Donald Currie does not ask that contributions shall be "paid" before Christmas. It will be sufficient if they are "promised" before that date. The payment may be spread over five years if desired.

Address to Sir DONALD CURRIE, G.C.M.G., F.R.G.S., &c., &c., from
the President and Council of Queen's College, Belfast.

SIR,—Permit us to bid you most hearty welcome on your appearance for the first time within the walls of the College to which you have been such an enlightened and splendid benefactor.

The munificent and wisely-conditioned gift by which you were last year the means, within four short months, of raising our "Better Equipment Fund" at one leap to the noble sum of £70,000 can never be forgotten amongst us. Already it has yielded its first fruits most promisingly, and we entertain no doubt that in all time coming the enlarged resources placed at our disposal through your help, and the greatly widened interest in our welfare which has been so delightfully exhibited of late by so many of our alumni and of the general community, will be found yielding an increased and most valuable harvest.

In commemoration of your munificence to our College, we ask your sanction to our naming the suite of Chemical Laboratories, now about to be completed through the agency of the fund to which you gave such timely aid, "The Donald Currie Laboratories," so that your name may for all time be inscribed upon our walls.

Our pleasure in greeting you to-day is materially enhanced by the fact that you passed the early years of your life in our city, and spent your schooldays at our two oldest and still flourishing academies. We rejoice that, through the wise and enlightened action of our Municipality, this your olden connection with Belfast has been officially recognised, and that your name will henceforth be found registered among the honorary burgesses of our city. No name could more fittingly find a place on that roll of honour than his by whose wise and beneficent hand the waters of the river of knowledge have been helped to flow in increasing volume, and by new and diversified channels, over the fair province of which our city is the capital.

We fervently pray that the thoughtful and generous action by which you have given such impetus to the learning and education of Ulster may return a thousandfold in blessing upon your head, and that for years to come you may see its happy fruits in the quickened spread of learning throughout our land. You need not doubt that, so long as Queen's College stands, this that you have done shall be told for a memorial of you.

(Signed in the name and by the authority of the Council of Queen's College, Belfast, and sealed with our common Seal this thirtieth day of June, one thousand nine hundred and six years)—

T. HAMILTON, President.

J. SYMINGTON, Registrar.

Address of the Students' Representative Council to Sir DONALD CURRIE,
G.C.M.G., on the occasion of his visit to Queen's College, Belfast.

DEAR SIR DONALD CURRIE,—We, the Students' Representative Council of Queen's College, Belfast, desire to join the official heads of the College in welcoming you amongst us. Your native city, proud of your services to learning and philanthropy, has inscribed your name on the roll of its freemen, and thus conferred upon you the highest honour within its gift. A like reward is beyond our power to bestow; but were human gratitude so weak as to require a scroll of fame to remind us of those whom we have delighted to honour we shall have one in our midst more lasting than parchment. As long as the evidence of your munificence will survive in the enlarged scope now afforded to college work and activity, so long will your name remain imprinted on the roll of those to whom our Alma Mater owes all that it is enabled to render to the cause of education in our beloved land.

The people of Ulster have not been slow to recognise the indebtedness to you of the province at large. But we, who are students, feel it is upon us has been conferred the greatest benefit, for it is we and our successors who shall reap the richest harvest from your generous action. We will not fail to remember this as we have not failed to recognise it, and we will see that those who come after us will be no less mindful.

As that noble fleet, which owes its existence to your genius and energy, has bound more closely to the mother country far distant parts of the empire, so will the memory of your benefactions bind to you by imperishable ties the grateful hearts of the students of this College.

On behalf of the Students' Representative Council,

W. H. DAVEY, *President.*

C. R. CRYMBLE, *Auditor.*

T. M. JOHNSTONE, *Secretary.*
